DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, 15-24 are drawn to a composition comprising one or more CB1 antagonist azetidine derivative of formula I, classified in class/subclass 514/210.01.
- II. Claims 11-14 are drawn to method of treating Parkinson's disease, classified in class/subclass 514/210.01.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, Parkinson's disease can be treated by another materially different product, such as anticholinergics, which block acetylcholine, and COMT inhibitors, which block the enzyme known as COMT.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Because these inventions are distinct for the reasons given above and the search required for Invention I is not required for Invention II, restriction for examination purposes as indicated is proper. A search in the

Art Unit: 1617

non-patent literature of the CB1 antagonist azetidine derivative of formula I will not lead to the search for Parkinson's disease.

Species Election

This application contains claims directed to more than one species of the generic invention.

The species are as follows:

1) a single disclosed CB1 antagonist azetidine derivative of formula I, for example 1-benzhydryl-3-[(methylsulfonyl)(phenyl)-methylene]azetidine

If applicant elects Invention I, applicant is further required to elect a single disclosed CB1 antagonist azetidine derivative of formula I from subsection 1. Currently, claims 1-10, 15-24 are generic to a CB1 antagonist azetidine derivative.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Note the court in *In re Herrick et al.* and *In re Joyce et al.* (both at 115 USPQ 412) held that an election of species requirement was, in fact, a restriction requirement.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1617

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A telephone call to the attorney is not required where: 1) the restriction requirement is complex, 2) the application is being prosecuted pro se, or 3) the examiner knows from past experience that a telephone election will not be made (MPEP § 812.01). Therefore, since this restriction requirement is considered complex, a call to the attorney for telephone election was not made.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yong S. Chong whose telephone number is (571)-272-8513. The examiner can normally be reached on M-F, 9-6.
